THE FIRE RECORD.

IARGE BULLDING DESTROYFO

MILWAUKLE, OCT. 22.—Al 10 o clock this evening his was discovered in the clock department of Chajoman's maniment dry goods establishment resulting in its complete destruction, together with the contents. There was a prompt response from the fire department, but it was soon evident that the structure was doomed. A general alarm was sounded, bringing out the entire bre department of the city, but even this seemed to have no effect on the flames, which swept through the magnificent establishment as though it was a tuder how. Within two hours from the discovery of the fire the building and contents were a mass of russ. The indiang was a four story brirk 210x50 feet, grand space, at the corner of Wiscoman and Milwaukee streets. It is boil projection on I revenue The poor errorg w men we fu men we by
of sympath and resp. t. The hive modernals, have told no her, have no trick with smooth bypor by to outfare their singui-sham. They have confessed their transgre-son, at a 1 in min slance and obstairily for his ter resource. Mara Hamin has lone this so has Eural eth I ken, and the word has a mercy for them. But Grover Cleveland and Brother Beecher hold their heads up loftly, or each other as good men, unlas the would to accept us cornect the invalid and of movais and virtue. 'I me enough one touch of let very makes all fethers kin!

Nothing less than a phenomenal moral of useness could permit this pair to paralle them where as vindicators of each other. Evidently they to use that he only thing it proves is that the morality of the exactly from the Beeches level, and that the morality of Beeches he of the Cheveland level. And the warmin of them freedom for and granted toward a hother secuta new illustration of the old maxim of library, that it believes all intricators t In one sense, thus Clevel mil-Beacher emissible is

rusing in another 1 is nauseous and disgus-ing first it should come to the front as the ading emsode in the democratic contest for the presidency makes everybody laugh. That Cleveand and Beacher, gross sinners that they are enough thus become instruments for punishing each other, while they entertain the not on tha they are doing each other a service, in the suot revelry of revenue which thus executes to n ion shameless transgressors. Ful that should have the assurance to press there iode of moreds toon the country awakens dis and kindles indigitation. CMHILL HENDELORS

Tal Helidricks, the ancien copperhia of Indiana, probably never will be happy. It is many a day since he saw a pointed satuation that pleased him. Not for twenty live we in has be been gratified, and he is still as since in disconsolate as ever—The situation that please him perfectly was the old era when the slave him perfectly was the old era when it e slave democracy of the south ruled the country through the help of his tracking servant, the do gh face of the north. That was broken up by the election of Lincoly in 1866, and of old Tom Hendricks it may be said that, after this entoward event, "the never smiled again." We have kept in a scrap-book an old schtoria

July 24, 18% the Tauce reclared that he had been "the friend and associate of the despert inder ook to strip Governor Morton of his pow ers and rob the state of Indiana of all means t assist in the suppression of the rebellion. Again "Ail through those trying your, when the great contest was being winged as distinctly and with m important couse juences in Indiana as on the Battle tields of the south, Hendricks voice over raised in behalf of the government are sever whispered a sylvidic of condemnation against the riebels. Further "He supported the fugitive slared by in its most offensive an maconstitutional features. He opposed the freeing of the fugilives who came into our camp from the rebel lines he opposed femancipation in the district of columbia he resisted the grociamation of President Lincoln he votes against enlisting negro soldiers he would no iedrew Johnson, which must have resulted in placing the freedmen completely under the her

of their former owne is In 1876 Hendricks was a candidate for the ice presidency, and the Ir cs opposed har with these arguments. He is now again a can date, and it surports him; not, however, because time has reversed instead, I at because the Arrive has reversed itself.

But what we were just the ut to say concern my the ancient copperhead at this time refers to iis lamentations on "Aednesday at ("hierge ove the interposition of the supervisors in the Ohio election Old Tom has always been unhapp, when the power of the thinted States has been alworked. He is in nearly as mulcitustress about the enforcement of the law to prevent repealing and other frauds in Ohid as he was about the euroliment and the draft and other measures for surforment and the draft and other measures for surforcers not of the laws for suppression of the rebellion. *Could not Oluc, the asks, 'conduct an election with at the Interference of burear officers at Washington'? Not when all the machinery of the election in Oluc was in the hands of the partisans of Hundricks, who had made every prehantion for sufficient health, boxes every preparation for stuffing the hallst boxe. This while from Hendricks is only a faken that the scheme was defeated Let is be observed that the supervision by the Linted States, if which he complaints is not partisen at all One - pervise from each party another for many continuous and only a property and the line of the complaints. parties a said of the perfect from each party is in animal for every perfect, and each party is the sea chief the said may the registry and the poll lats. The law is a terror out to extend doers its officers can petitle; him for inte-rit pt any legal veter and if there was distintinuce in (in commit it was the consequence of the start to force in the beary illegal vote which the supervisors kept out. But, is might be expected, this is it's He iditicks almost as much as of the measures employed for the suppression of the great rebellion.

Set og Buil, one of the most coughty of hymi, warriors, the fierce chief who puissinged in d scaiped Quater and his command, has been ex-bibit g himself to the time muslums of the Lastern states in this been led by his observe from to conclude the rice suscless to wan against thous to conclude that it is useless to wan against the white man. Then are more white perpiet? It below, than he blades of gives on the graine. I shall fell my people their when we get book. But the given men should be given be to the cochange in frest is. My briller, I ong Bey, has only ne voke flower to 1s haply if five an ise. The shown in the first an ise of the consideration as will be easily as agreed. He puts the who is light and gives the government since there which should be treester.

The loudon I own a reviewing of its sing when in Figlini, of ones. In glish factions could not find to muse it, everif prices were of per cent, higher than then in now-hat is, if they were about 40 shillings a granter instead of a soul 30 shillings a quarter It is also estimated that the producers in Incirampot raise wheat a present prices. England, in the opin on of the Economist, is to become a great poultry pard, rechard, and freed patch, and it of countries for practically the whole specula of her breadstuffs.

The major ity of the old solders, we me countert, value their presign in a gloss more than the benefits they would reclass from the proposed legisla-tion, and it is easy possible that the wild discuss on which the receive of these treasures have invited mile can paig r will defe tithem in the raice of their mare formal reportion by con-

Almost without exception the greenbackers are now protections s. At T. P. William for example, a greenback can be take for congress on be Twentieth Pennsylvania district, and an nounces is platform in these wors. "Inchesses the tariff. If we do negamp, "a stimm we can make." The green rek, party proposed to cheapen room updet to mercuse combinationally wages. He protectionists also profess to mercuse wages to legislation. The commen basis of both propositions is the soft list there that it is the business of governmen to make very entrements and large. But the government was founded upon the totally different theory, that the greatest happiness of the greatest num-ber will be secured by allowing each member of the community to manage his open affairs, so long as he does not mentere with the equal rights of his neighbors. That is the American Of course this government will in the to which theres upon imports for the pur-tores of revenu, afford some protection to the business interprets of the people. If it only fair th this tax should be so levisit as to discrimi ha e in favor of American industry. But if the tariff should be art iterally increased unit I "we do not import outly ng we can indee" we should soon make more than we could dispose of a home, and the cost of its manufacture would le so high that we could not find a market for our surplus alloud, and the result would be that mile would be a crued cally closed and behores thown out of any bytened, as show the case with the units at ball fiver and elsewhere in

According to M. Fallieres, France is no engaged in a policy of conquest in China. The government merely desired, he says, to exact respect for violated freaties and to avenue Chinose spect for violates treates and to average (timese brusils to the French flag. But this is a poor extra e for the extens we business of invading (hims and islumg her population in which the French array is engaged. It has been pretty well established that no heart has been vio ated. and that the Lang-Son affair was caused by French precapitant. And yet they go on bom barding Chinese forts and cities, sphing Chinese vessels and occupying thinese territory as if much blood and treasure to explain Mark That call the Claring war France evidently wishes other unlines to understand that while fighting Chieve she is doing so upon peace principles. This is a so tof warfare which entails its own danger. It is not thown how the "three emperors" elewed this matter, nor 14 if certain what England will do in the last resort, but France is inching all each like the communitier of a steamer in a deuse log off a lee shore. She may bring up in hime and she may be it is pretry clear that she is not sine of her bearings nor of the coast upon which she is drafting. The Chinese are no math, for these quarkers in usual way. fa e, but if they do not soon recover from their suspineness and retaliate by a llow at Longuin or the landside they will deserve to levalled the cowness of the world

While the democrats, unlike the republicans, lave no large list of federal officials to draw upon for carpaign fends, they are making the most of their opportunity in Serving upon state and against pale officers. The decids in the comptroller's office in the city of Newark, New Jersey have recently paid a computation to the Jenocratic campaign fund of #50 each. Other Gerks in the city hall have been assessed \$50 each by the local democratic leafers while the heads of democratic leafers while the heads of democratic leafers. ers while the heads of departments have been requested to contribute larger quass. A cuty criplots who so margif salary is \$5100 was as beesed \$100 | A tw. was also land on the police department. Of each patrolinant \$15 were denamed. The sergeants paid \$25 to \$55, the cutams \$7, and the chief of roles \$150. The primes complain of the burden laid on them, but w a rule fact have deemed it wise to pay over to money. There is no law in New Jersey to prevent routery of this kind, and up the opinion it ere as elsewhote is an altogether insufficient

The majority on main bers of congress in Ohio - 14, 50—can be called the leg timate republican in morning in the state, since the fight on members of congress was not so much affected by the n provincestion as that on the canditates upon it estate twicket The magnify of the democratic perrymance is well plustrated by the fact, that il ough the republicans have this great majority n) members of congress the em crate at ually have a majority of the members.
